

A photograph of the San Francisco skyline at dusk, featuring the Transamerica Pyramid and other skyscrapers reflected in the water. The sky is a mix of blue and orange hues.

Apply your knowledge to
industrial production,
get an internship at a tech
giant.

Before We Start

Traditional Development Roles

R&D Roles:

- QA Engineer
- Frontend Engineer
- Backend Engineer
- Client Engineer
 - PC Client (Windows / Mac)
 - Mobile Client (iOS / Android / Mini Program)
- Game Engineer
- (Some) Algorithm Engineer
 - Some algorithm belong to research roles
- and more...

NOT Traditional Development Roles

- Research Roles: Technical Research (Not University RA)
- Product Roles: Product Manager, Product Planner, Game Planner
- Design Roles: UI Design, UE Design, Visual Design
- Operations Roles: Operations Engineer, DevOps Engineer
- Data Roles: Data Analyst, Data Engineer

University **Research Assistant**

Please refer to Jiayi Zhang's sharing on finding research experience This is not an industry internship,

Overview

- 1. Why find an internship?
- 2. What do I need to know before an internship?
- 3. How to prepare a qualified resume?
- 4. How to find internship opportunities?
- 5. Interview Skills

Why find an internship?

Why find an internship?

Why?

- 1. Connect theory with practice
- 2. Adapt to the workplace in advance
- 3. Enrich resume, increase competitiveness
- 4. Explore interest directions

What can an internship offer?

What can an internship offer?

From a Technical Perspective

- Learn real teamwork
- Large-scale and real project experience
- Technical ability improvement and best practices
- Understand industry trends and technology trends

From a Personal Perspective

- People met during the internship
- Income from the internship
- Professionalism and communication skills
- Life resume

What do I need to know before an internship?

What do I need to know before an internship?

Tech Stack

Tech Stack

Relying solely on classes is **NOT enough!** You need to **learn by yourself~**

- Master a programming language

Frontend: HTML/CSS/JS + TS

Backend: Go / Java / Node.js / Python

Client: Swift / Kotlin / Flutter

Data Analysis: Python / R (More towards finance)

- Master corresponding development frameworks

Frontend: Vue.js / React

Backend: Express / Spring Boot / Django

Client: SwiftUI / Jetpack Compose / Flutter

- Understand basic data structures and algorithms (Leetcode)

- Understand computer network basics (Frontend, Backend roles)

- Familiar with the use of common development tools

Git / Docker / IDE / API Debugging Tools / Browser Developer Tools

Where to learn? How to learn?

Where to learn?

Subjective Initiative is very important!

Watch More

- **Online Courses** (Bilibili, YouTube, Coursera, CSDIY)
- Technical Communities like Juejin, Medium, SegmentFault, Stack Overflow
- Blogs / WeChat Official Accounts of Experts / Tech Giants Recommended:
Tencent Technology Engineering, ByteDance Technical Team, Zhuanzhuan FE, etc.
- On-campus Student Groups (CPU)

Do More

- Personal Projects (For Resume!)
- Open Source Projects (GitHub)
- On-campus Projects (FURP, GRP)

Communicate More

- Participate in Community Activities Hackathon Tech Sharing Sessions Tech Salons
- Communicate more with experts

How to prepare a qualified resume?

How to prepare a qualified resume?

What does a good resume usually contain?

01.
**Who are
you?**

02.
**What can
you do?**

03.
**What have you
done?**

What does a good resume usually contain?

Content Aspect

1. Personal Information
2. Internship Experience
3. Project Experience
4. Skills List
5. Education Background
6. Other Experiences

Regarding your **Experience**

Verticality is very important!

Showcase experiences that **match** the position as much as possible, reflecting relevant tech stacks, Reduce irrelevant experiences and tech stacks.

More is not always better!

How to create a resume

- Use Document Resume Templates (Not Recommended)
 - Word / Google Docs / WPS / OverLeaf
- Use Online Resume Generators (Recommended)
 - Resume Tool provided by UNNC Careers Office (Free)
 - Tencent Docs · Resume Assistant (Paid)
 - Nowcoder Resume (Paid)

Why recommend Online Resume Generators?

Guide you to input appropriate content in appropriate places.

Save effort on layout, avoid wasting a lot of time on formatting.

How to find internship opportunities?

How to find internship opportunities?

Where to find internship opportunities?

Where to find internship opportunities?

- Corporate **Campus Recruitment** Official Websites (Recommended)

Tencent: <https://join.qq.com/>

Alibaba: <https://campus.alibaba.com/>

ByteDance: <https://job.bytedance.com/campus>

Bilibili: <https://job.bilibili.com/campus>

miHoYo: <https://jobs.mihoyo.com/#/campus>

- On-campus Job Fairs

School Careers Office Official Account (WeChat: 宁诺就业)

Careers Office Website careers.nottingham.edu.cn

- Campus Recruitment Talks (Online/Offline)
- Recruitment Websites (Shixiseng, BOSS Zhipin, etc.)
- Internal Referral (Through Alumni, Friends, etc.)

How to find internship opportunities?

How to find internship opportunities?

- **Prepare in advance**, pay attention to recruitment information release time (Usually 3-4 months in advance, i.e., around February)
- **Apply more**, increase interview opportunities
- **Customize Resume**, adjust resume content for different positions
- **Keep in touch**, communicate with recruiters, show positive attitude
- **Prepare for interviews**, understand company and position requirements in advance

Interview Skills

Interview Skills

What questions are asked in interviews?

What questions are asked in interviews?

Read more interview experiences, memorize Standard Technical Questions

Understand technical knowledge

Interview Experiences

- Xiaohongshu [xiaohongshu.com](https://www.xiaohongshu.com)
- Nowcoder [nowcoder.com](https://www.nowcoder.com)
- GitHub github.com

Standard Questions

- WeChat Official Accounts
- GitHub
- "Baghu" Websites

You must memorize "八股" thoroughly.

Algorithm is also important

Algorithm is important, even for front-end and testing roles.

Even if you are applying for Frontend or QA roles.

- Leetcode Practice:
 - Master Hot 100 thoroughly
 - Memorize classic problem patterns
 - Maintain a frequency of 1 question per day / at least 3 questions per week
- Nowcoder Questions:
 - Understand common interview question types

Don't worry, it won't be as hard as ACM. Many are **basic question types**. (Except for some Backend and Algorithm roles)

Behavioral Interview Questions

Behavioral Interview Questions

STAR Method

- **S**ituation
 - **T**ask
 - **A**ction
 - **R**esult
- Introduce your own experience Understand if your background and tech stack match the position, and your capabilities
 - Why did you choose this position?
 - What did you do in your xx internship / project experience? Judge if you really participated in the experience.
 - What challenges did you encounter during development? How did you solve them? Judge your problem-solving ability at work

Good luck with your job search!

Thank you for participating!

Q&A Session
